

Support Services for Hot-Gas Filters and Heat Exchangers

Project Lead

University of North Dakota
Energy and Environmental
Research Center
Grand Forks, ND

Description

The purpose of this project is to for the UNDEERC to review and, possibly, propose modifications to ceramic and alloy corrosion tests planned by the Advanced Research Materials Program. The UNDEERC shall provide analytical support by analyzing fuels, deposits, and materials corrosion products to determine the source and transformations of inorganic materials originating in the coals that cause corrosion of the materials coupons.

Duration: 3/31/99 - 3/31/05

Product Support Areas

Gasification Technologies	Combustion Technologies	Sequestration	Environmental & Water Resources	Advanced Turbine & Engines	Fuel Cells
					

Project:
Code: UNDEERC-1
